

Coyote Popup

The Coyote popup display system combines strength and reliability with style and ease of use. Named "popup" because of its "small to large" pop-up action, this type of display system is still one of the most portable tradeshow and display solutions available. The Coyote system features several unique advantages over other similar popup display systems, especially its light weight and simplistic ease of use. Compared with complicated "snap in" channel bars and delicate locking/locating systems, the Coyote popup display system uses state-of-the-art "rare earth neo magnets" on both its channel bars and locking/locating systems. These make it very quick and simple to erect and take down, with practically no "easy-to-break" parts.

Product

Coyote (4x3)118" w x 36.5" h

Footprint
